

Ultra-Aire™

WHOLE HOUSE VENTILATING DEHUMIDIFIERS

Ultra-Aire Hang Kits

Ultra-Aire hang kits can be used to suspend any horizontal Ultra-Aire dehumidifier in a crawl space, basement or attic setting. Hanging an Ultra-Aire dehumidifier provides protection from potential flooding in crawl space or basement applications, offers the ability to free up floor space, reduces possible vibration in an attic installation, and also provides additional height for proper condensate drainage / removal.

- **Quick and easy installation** – Minimal parts
- **One person setup** (regardless of the dehumidifier), reducing labor costs and time
- Ability to **hang ANY horizontal Ultra-Aire dehumidifier**
- A solution that can be **used in attics, crawlspaces, basements, and more.**
- **Adjustable, heavy duty ratchet straps** – each strap will hold up to 150 lbs each

Small Hang Kit

Part Number 4036695
